Furthermore, as to claims 7-13, Bierman discloses that the device includes a viewing port, that the retaining means is translucent, that the retaining means is in the form of a clamp, the attachment means is in the form of a wing, which includes a peel off adhesive and a tab (see figure 6).

In addition, as to claims 14-15 and 17-20, Bierman teaches the device includes a securing means with protrusions (24a), and wherein the receptacle has open and closed positions (see figure 6), a clip a pliable wing and that the tube is secured by way of guiding the tube between protrusions (see figures 6 and 9).
